

If you Drive one of these....

You need One of These.....

Pressure Pro
Tire pressure monitoring systems.

“Reliable Under Pressure”™

Reduce fuel, tire and maintenance costs with PressurePro!

Save fuel! PressurePro helps avoid excessive fuel consumption caused by under inflation.

Increase tire life! PressurePro assists in avoiding excessive tire wear and casing damage caused by under inflation.

Add safety! PressurePro is designed to provide an alert to low tire pressure problems before critical damage occurs.

Improve stability, handling & braking! PressurePro provides digital pressure readings, helping drivers maintain optimal pressure levels at all times improving braking, handling and stability.

Enhance performance! PressurePro assists drivers in keeping their vehicle's tires running at top performance.

you
checked
your
tires
lately?

PressurePro Truck Monitor

Truck and Trailer Monitor

Monitors up to 34 wheel positions

PressurePro monitors up to 34 wheel positions and tire pressures up to 199 psi. Quick and simple to install, PressurePro can easily be transferred between all types of vehicles to accurately measure tire pressures at the touch of a button. Unlike other TPMS products, PressurePro displays current pressures and alerts to low pressures while on the move or parked.

Save time, save fuel, save tread wear and save on down time - PressurePro gives YOU the competitive advantage.

PressurePro TPMS is also available for auto's, RV's, industrial equipment, buses and trailers. Order your PressurePro system today!

Auto/Light Truck Monitor

Monitors up to 6 wheel positions

RV/Van/Truck with Tow Monitor

Monitors up to 16 wheel positions
